

Cross-modal Semantic Alignment Via Ensemble Audio-Text Features For XACLE Challenge

Snehit B. Chunarkar¹, Krishnagiri Hamza², Chi-Chun Lee¹
¹National Tsing Hua University, Taiwan; ²SRM University, Chennai, India

AIM: Predict **Audio-Text Alignment Scores**
that reflect subjective human ratings

Dataset	XACLE Challenge 2026 dataset		
Split	Train	Validation	Test
Sample	7.5k	3K	3K

Train/Validation			
wav_file_name	text	score	listener_id
05765.wav	"Birds chirp loudly in the distance followed by a person talking nearby and then more chirping"	1	eh1hohsr
05597.wav	"Engine is running, a man speaks over it and distant traffic sounds"	10	jz9i9k96
01792.wav	"A man speaking with water faucet turning on pouring water briefly before turning off and muffled plastic thumping"	6	46jz35dc
:	:	:	:

Test	
wav_file_name	text
10500.wav	"The sound of water slowly trickling into a pool of water"
11220.wav	"A child laughing, which makes an adult laugh"
:	:

Figure: Proposed Architecture

Version	Ensemble Set	Experimental Settings	Validation				Test
